REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
 - With regard to claim 1; as the closest reference, Perterson et al (US 5,999,372) shows an actuator for a data storage device, including: an actuator comb having a pivot assembly aperture and an actuator arm; a leading edge and a trailing edge on the actuator arm; and wherein the leading edge and the trailing edge have aerodynamic profiles for reducing a coefficient of air flow drag for the actuator arm, the leading and trailing are tapered at respective ends, **but fails to show** that the leading and trailing are tapered at respective ends in directions extending along the leading and trailing edges
 - With regard to claims 5, 7, and 11; as the closest reference, Perterson et al (US 5,999,372) shows an actuator for a data storage device, including: an actuator comb having a pivot assembly aperture and an actuator arm; a leading edge and a trailing edge on the actuator arm; and wherein the leading edge and the trailing edge have aerodynamic profiles for reducing a coefficient of air flow drag for the actuator arm, the leading and trailing are tapered at respective ends, **but fails to show** that each of the leading and trailing edges extends from the pivot assembly aperture to a suspension tongue.
 - Applicant assumes that the disk drive as described would consume less power, thus produce less heat, which must be dissipated. The spindle motor design is reconfigured at a lower torque constant thereby lowering the overall cost of the device (Specification, p. 3).
 - Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
